# TATO ZHVANIA | DevOps Engineer & Fullstack Engineer

551 909 737 | tato.zhvania.1@gmail.com | Tbilisi, Georgia | WebSite | Linkedin | GitHub

I am a hardworking and ambitious DevOps Engineer from Georgia, combining a strong foundation in Web Development with expertise in Monitoring. I am passionate about building scalable applications and specialize in automation, observability, and optimizing system performance.

With extensive hands-on experience across on-premises infrastructure and AWS cloud services, I manage the full stack using infrastructure as code with Terraform. I excel at deploying, maintaining, and troubleshooting applications in dynamic environments using Docker, Linux, and Kubernetes. I implement proactive monitoring using Prometheus, Grafana, and Graylog to ensure system reliability and enable rapid incident resolution. Furthermore, I develop and manage Python automation scripts with Apache Airflow to streamline and improve workflow efficiency.

Additionally, I am a Certified Kubernetes Application Developer (CKAD) and am driven by the goal of becoming Georgia's youngest Kubestronaut, dedicated to mastering Kubernetes and its ecosystem to build next-generation, resilient applications.

## EDUCATION

**Bachelor of Information Technologies** | Business and Technology University | since 2021

## TRAININGS

**Web Development, React** | Skillwill Academy | Mar 2023 · May 2023

## AREAS OF EXPERTISE

***Web***:

HTML, CSS, Javascript, React, TypeScript, Tailwind CSS, Redux, Express, Flask, GIT, Firebase, Figma, Adobe, SQL/MySQL

***DevOps:***

Linux, Shell/Bash, GitLab Pipeline, Jenkins, Docker, Python, HAProxy, Nginx, Nexus, K8S, HELM, ArgoCD, Grafana, Prometheus, AWS, Terraform

***Additional:***

Zabbix, Graylog, SigNoz, Airflow, Postgre, MongoDB, ML, N8N

## LANGUAGES

| | |
|---|---|
| Georgian | Bilingual proficiency |
| English | Full Professional proficiency |
| Russian | Elementproficiency |

## INTERPERSONAL SKILLS

- Analytical thinking
- Communication skills
- Teamwork
- Adaptability

## Certifications

- **Certified Kubernetes Application Developer (CKAD) - Linux Foundation**
- Web Development, React.js - SkillWill
- DevOps Engineering - Gita

## PROFESSIONAL EXPERIENCE

Aug 2025 - Present

**DevOps Engineer**

*Crocobet- Tbilisi, Georgia*

- DevOps & Observability Engineer with a focus on building reliable and scalable systems.
- Architected, implemented, and maintained efficient CI/CD pipelines to accelerate development cycles and improve deployment reliability.
- Expertly managed containerized ecosystems, orchestrating with Kubernetes, packaging with Helm, and implementing GitOps practices using ArgoCD.
- Automated infrastructure provisioning and configuration, reducing manual effort and ensuring environment consistency.
- Spearheaded monitoring and observability initiatives by designing dashboards, configuring alerts, and analyzing metrics/logs/traces to ensure system health and performance.

June, 2025- Aug 2025

**Cloud & DevOps Inter**

*EPAM Systems - Remote*

- Kubernetes for container orchestration and scalable application deployment
- Continuous Integration and Continuous Delivery (CI/CD) fundamentals, including pipeline creation and automation best practices
- Jenkins for automating build and deployment processes
- Amazon Web Services (AWS) for cloud infrastructure and services
- Terraform for infrastructure as code and automated provisioning
- Agile methodologies and collaborative development workflows

Jan, 2024- Aug 2025

**Monitoring Engineer**

*Crocobet- Tbilisi, Georgia*

- Proactively monitor system performance using Zabbix, Grafana, and Graylog to detect anomalies and ensure smooth operations.
- Manage and automate Python workflows with Apache Airflow to support data pipelines and system tasks.
- Use Docker and Linux to deploy Python scripts and maintain isolated, scalable environments.
- Collaborate with development, infrastructure, and QA teams to troubleshoot issues, deploy updates, and improve system reliability.
- Maintain website functionality and resolve incidents via Jira, coordinating with external providers when needed.
- Continuously enhance automation and monitoring practices to support system availability and align with business needs.

May, 2022 - Nov, 2022

**KYC Specialist**

*Upgaming – Tbilisi, Georgia*

- Ensure compliance with regulatory requirements by verifying customer identities.
- Assess risk levels associated with customer accounts to support due diligence processes.
- Review and validate customer documentation for authenticity and accuracy.
